## intro **distribution**

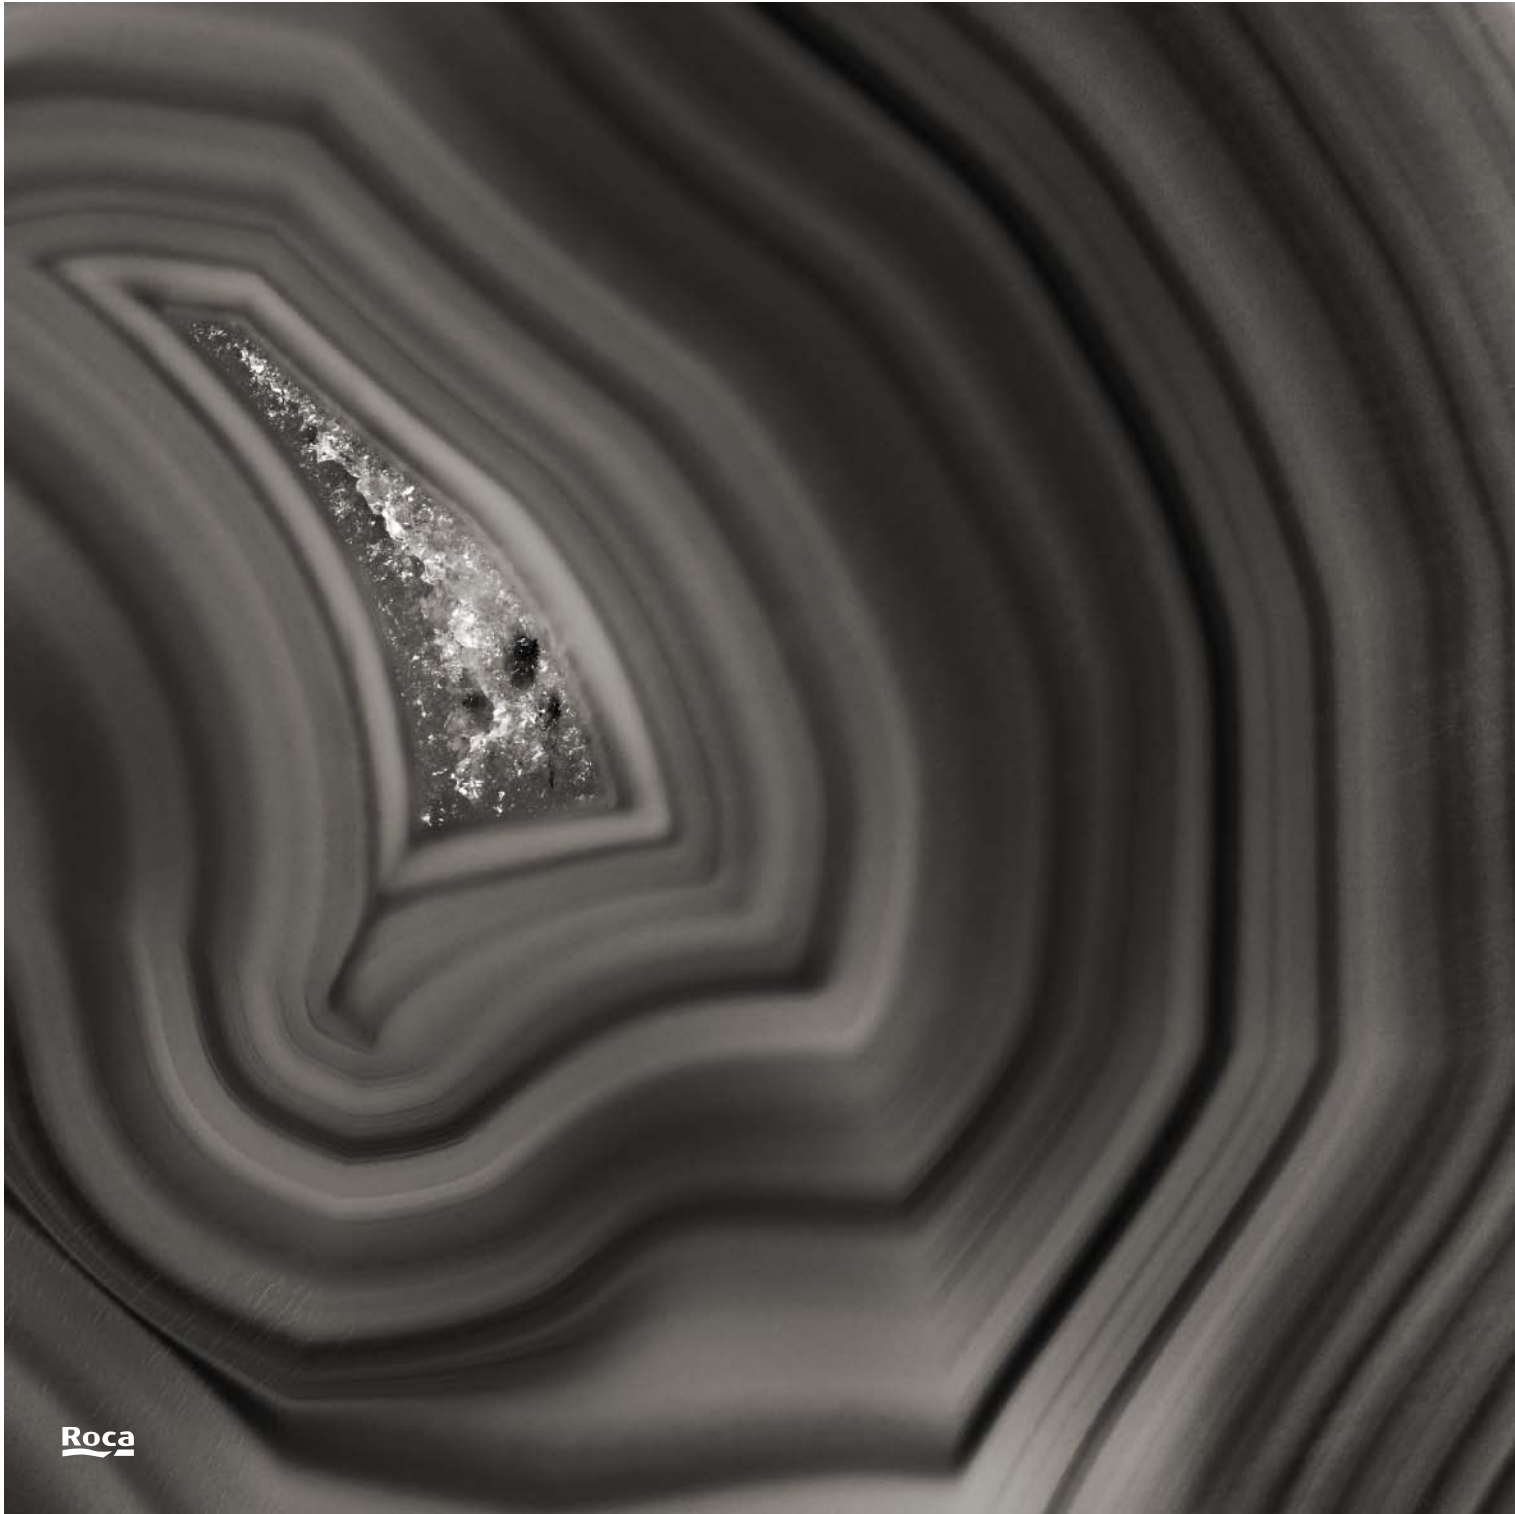

**Roca Tile Group** is dedicated to the production and commercialization of floor and wall tiles. Created in 1979, it applies the same philosophy of respect for the environment established by **Roca**, a philosophy that is widely recognized at the international level along with an intense passion for design and an absolute obsession with quality. Roca Tile Group has been Spain's largest tiles manufacturer group since 1999.

**Roca Tile Group** offers an infinite variety of new items to respond to different requirement and sensibilities all around the world. Each product is designed on the principles of innovation, quality and sustainability, with one sole aim in mind: to provide greater quality of life while contributing to the preservation of the planet. With this aim in mind, it's Design Department works with prestigious firms and professionals in the fields of architecture, industrial design and interior design.

The solar system is constantly changing and evolving, offering the most beautiful and unsurpassable show imaginable. A firmament to which **Indesore Living Solutions Ltd**, wants to pay tribute bringing to Bangladesh it's universe of solutions and technology, styles and ranges, beauty and emotions through **Roca Tile group's distribution**.

Welcome to the sustainable beauty of **Roca Tile Group**.

## Laying recommendations

Correct, careful laying of Roca's ceramic products is vital for taking full advantage of their technical characteristics. For this reason, the following points are necessary:

- 1-Check the calibre, tone and quality of the product before laying.
- 2-Choose appropriate installation tools (toothed trowel, white rubber hammer, suction grip and rubber trowel for pointing).
- 3-Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.
- 4-Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).
- 5-The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. Roca Cerámica recommends laying the tiles with a minimum joint of 1 mm and checking for other indications given on the box (measurements between calibres, recommended joint).
- 6-Do not use coloured pointing material containing black smoke (micronised carbon) or dyes which can hamper the cleaning of the tiled surface.
- 7-Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.
- 8-Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration.
